

Colour probe - page 1: measurement blocks

Every block is one known RGB value. Send this page through the colour tool you liked, then send its result back - the mappings are read straight

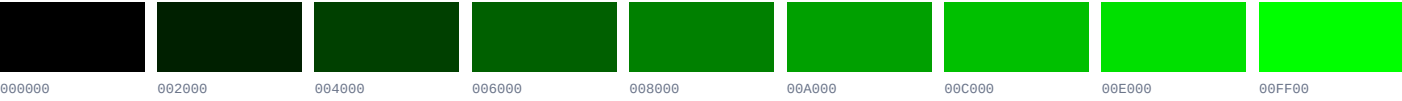

grey 0-255 (step 16)

red ramp 0-255

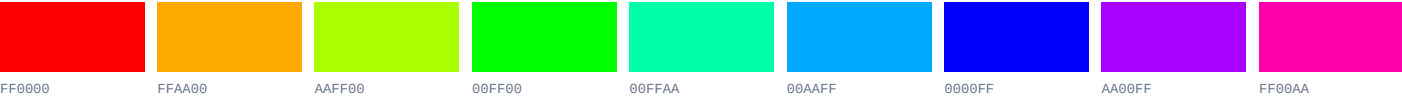

green ramp 0-255

blue ramp 0-255

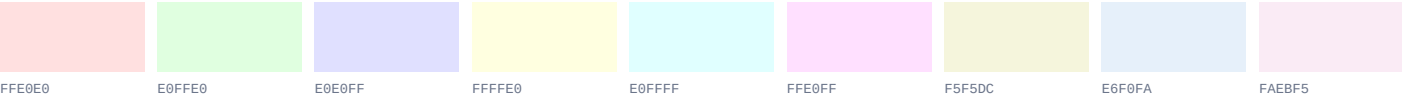

hues 0-320 (100% S, 100% V)

hues 0-320 (100% S, 50% V)

pastel tints

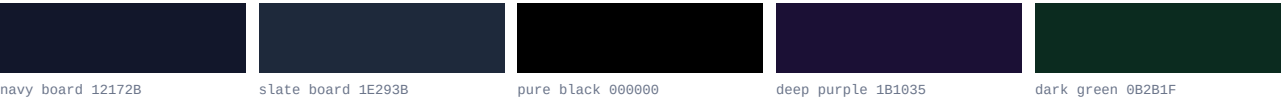

dark shades

pen colours

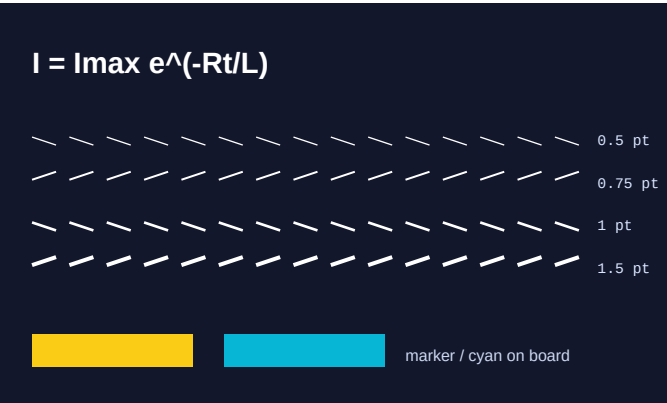

board colours

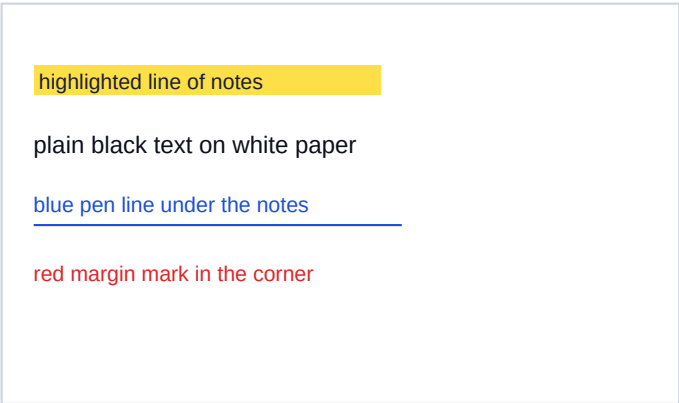

Colour probe - page 2: gradients and real handwriting

The strips show whether the tool works per pixel or with a curve; the panels show what happens to thin strokes, markers and highlights.

dark board + thin strokes

light page + highlighter

black - white

white - black

blue - yellow

red - cyan

navy - white

Colour probe — page 3 · how to use it

Send page 1–2 through the tool you liked, then send its output back (PDF, screenshot or photo — all fine).

What happens next

1. Open the other colour-inversion tool you liked.
2. Send this PDF (or take a screenshot of page 1) into it and convert.
3. Send me back the result — the PDF, a screenshot, or even a photo.
4. I read every block, work out that exact colour rule of that tool
(255 - c, or luma-based, or hue-preserving, or thresholded...),
and make Notes2A4's True negative match it exactly.

Tips for a clean result

- Keep the tiny corner squares visible — they let me line up the grid.
- A screenshot is perfect; make sure blocks are not cropped.
- JPEG/photo is fine too — there are pure black and pure white reference blocks so I can correct for compression and lighting.

Legend — page 1 rows (17-step grey is the widest row)

grey 0-255 (step 16)	17 blocks: 000000, 101010, ... FFFFFFFF
red / green / blue ramp	9 blocks each: 00, 20, 40, 60, 80, A0, C0, E0, FF on that channel
hues 0-320	9 hues at full brightness, then the same 9 at half brightness
pastel tints	very light red / green / blue / yellow / cyan / magenta / cream / sky / rose
dark shades	dark red, green, blue, olive, teal, purple, greys, navy-ish
pen colours	page 1, last-but-one row: blue, red, green, orange, teal, purple, pink, amber, brown, indigo
board colours	page 1, last row: navy, slate, black, deep purple, dark green
gradients	page 2: black-white, white-black, blue-yellow, red-cyan, navy-white
panels	dark board with 0.5/0.75/1/1.5 pt strokes; white page with a highlighter
